ABOUT HAAKDOORNBOOM

An experienced garden maintenance partner

Managing a residential complex means balancing the appearance of shared spaces with day-to-day maintenance needs. A garden service needs a clear scope of work, identifiable people on site and an accessible contact when priorities need attention.

Haakdoornboom Gardening Service brings more than two decades of garden maintenance experience across homes, corporate gardens and townhouse complexes. Services cover routine garden upkeep, garden refuse removal, selected weed and pest control, and irrigation servicing and repairs.

Personal involvement in service delivery

Owner supervision	The owner is on site while work is carried out. This gives the property representative a direct route for discussing the garden, raising concerns and clarifying the work required.
A permanent team	Work is carried out by permanent employees. For a managed complex, continuity in the people attending the property supports familiarity with its gardens and day-to-day requirements.
An identifiable presence	Employees wear branded work suits. This presents a professional appearance and helps residents and property representatives identify the garden maintenance team.

For property managers, trustees and representatives overseeing shared gardens.

CORE SERVICES

Keeping communal gardens presentable

Our core services address the everyday upkeep of lawns, planted areas and pathways. For a complex, the quotation should identify which communal areas are included and whether any private gardens form part of the service.

01 Lawn mowing

Mowing of lawns to maintain a neat appearance across the areas included in the service. For a complex, clearly identifying common lawns and any included private areas helps establish a consistent scope.

Quotation detail: lawn areas and required visit frequency.

02 Flowerbeds and pathways

Maintenance and cleaning of flowerbeds, together with blowing of pathways to remove loose garden debris. These services support the presentation of planted areas and the routes residents use through the property.

Quotation detail: beds, pathways and priority areas.

03 Minor pruning

Minor pruning of garden plants to keep planted areas tidy and manageable. Specific plants and the extent of pruning required should be identified when the work is discussed.

Quotation detail: planting areas and the pruning required.

04 Garden refuse removal

Removal of garden rubbish to leave the maintained areas clean and orderly. Agreeing which material is included helps distinguish garden maintenance refuse from other waste generated at the property.

Quotation detail: included refuse and removal arrangements.

SUPPORTING SERVICES

Weed control and irrigation care

Alongside routine upkeep, we provide weed control, selected garden pest control and irrigation servicing and repairs. Discuss these requirements as part of your property brief so the scope can be agreed.

Weed and selected pest control

We provide weed control and assistance with selected garden pests. Identifying the affected planting or areas of the grounds helps focus the discussion on the treatment required. Please describe the problem when requesting a quotation so Ferdi can confirm whether it falls within the services available.

For the property manager
Identify affected areas and agree any access or resident communication arrangements needed for the proposed work.

Irrigation servicing and repairs

Our offering includes servicing and repairing irrigation systems. Where a system needs attention, provide available information about the affected area, access to the system and the issue observed. Confirm the proposed repair work and any associated charges in the quotation.

Define the work before it starts
An irrigation repair or a specific treatment may have different requirements from routine garden upkeep. Confirm what is included, what requires a separate quotation and who may approve additional work.

FOR MANAGING AGENTS AND TRUSTEES

A clear brief for your complex

A well-defined brief makes it easier to request a relevant quotation and agree expectations. The following points provide a practical basis for discussing your property with Ferdi Horn.

01 Identify the property and areas

Provide the complex name and location, describe the grounds, and distinguish communal gardens from private areas. Highlight lawns, beds, pathways and irrigation requiring attention.

02 Discuss frequency and priorities

Set out the visit frequency you require and the areas that need particular attention. Raise seasonal needs, existing maintenance concerns and any urgent work at the outset.

03 Confirm access and site arrangements

Explain access procedures, suitable working times, garden refuse arrangements and any applicable site rules. Identify the managing agent, trustee or other representative who will be the main contact.

04 Agree scope and commercial details

Ask for the quotation to state the included work, visit frequency, price and payment terms. Confirm how additional work or repairs will be quoted and approved, and whether any materials are charged separately.

APPOINTMENT AND HANDOVER

Before commencement, confirm the agreed scope, intended start date, contact person and any supplier documents required by your organisation.

DISCUSS YOUR PROPERTY

Client references and enquiries

The following references are provided for enquiries about Haakdoornboom Gardening Service. They give prospective clients a starting point for discussing service experience and suitability for their own property.
